

Job Summary

We are looking for an experienced **Batching Plant Operator** to operate and manage the concrete batching plant for infrastructure and highway projects. The candidate will ensure accurate batching, consistent concrete quality, smooth plant operations, and compliance with safety and quality standards.

Key Responsibilities

1. Plant Operations

- Operate the batching plant to produce concrete as per approved mix design.
- Ensure accurate batching of cement, aggregates, water, and admixtures.
- Monitor plant controls and adjust settings as required.
- Maintain continuous supply of concrete to site as per daily production plan.

2. Quality Control

- Follow approved mix designs and technical specifications.
- Coordinate with QA/QC team for slump tests and cube testing.
- Ensure consistency in concrete quality and report any deviations.
- Maintain batch records and daily production logs.

3. Maintenance & Troubleshooting

- Perform routine inspection and preventive maintenance of the batching plant.
- Identify and report mechanical or electrical issues.
- Coordinate with maintenance team for breakdown repairs.
- Ensure proper lubrication and cleaning of plant components.

4. Material Management

- Monitor stock levels of cement, aggregates, admixtures, and water.
- Coordinate with stores and procurement for timely material availability.
- Maintain records of daily material consumption.

5. Safety & Compliance

- Follow site safety guidelines and PPE requirements.
 - Ensure safe operation of plant and equipment.
 - Maintain proper housekeeping around the batching plant area.
 - Comply with environmental regulations and dust control measures.
-

Required Qualifications

- ITI / Diploma in Mechanical, Electrical, or Civil Engineering (preferred).
 - 3–7 years of experience operating a concrete batching plant in infrastructure, road, or highway projects.
 - Experience with computerized batching systems.
-

Required Skills

- Knowledge of concrete mix design and batching processes.
 - Basic mechanical and electrical troubleshooting skills.
 - Ability to read technical instructions and production plans.
 - Good coordination and communication skills.
 - Understanding of site safety procedures.
-

Preferred Experience

- Experience in highway or expressway projects under **National Highways Authority of India**.
 - Experience working with reputed infrastructure companies such as **Larsen & Toubro** or **Afcons Infrastructure**.
 - Familiarity with **RMC, PQC (Pavement Quality Concrete)**, and **DLC (Dry Lean Concrete)**.
-
